

Construction Projects Update

Parking Lot

Representatives with KCIA continue to work alongside the teams at Hollis Miller and HL Huber as we move towards groundbreaking in the next few weeks. Additional soil testing has been ordered to ensure the parking lot foundation meets all specifications. More information will come when the groundbreaking date has been set.

Library Remodel

As a result of the generous donation by Northpoint Foundation, contractors have started renovating a common area on the main floor of KCIA. We will go from one single space to four classrooms. Ultimately, this will help with the fifth-grade transition, which the middle school team will support. This project will be complete by the first of August and ready for teacher and student use.

Office Space Remodel

The renovation of the art room, which will result in two additional office spaces, has also commenced. We want to reassure you that this project was intentionally included in the budget as presented during the April regular board meeting. It will be completed by the first of August and ready for staff use.
