Part 3: What do we see when looking at ADA drivers? Early in the year, how can we think about ADA movement?
Data Takeaways
Key Takeaways(s):   - The data below shows how ADA will move in response to changes in either (a) attendance rate or (b) typical enrollment.   - Given data through 9/30, implied ADA is right around 113. This can be interpreted as "if our attendance rate and typical enrollment remain exactly the same the rest of the year, we would be tracking toward 113 ADA".   **As we know, this data is from a small portion of the year and will change over time. So while currently ADA is 113, it is advantageous to use estimate below this number to account for the likelihood of attendance declining, enrollment declining, or both.**

90/90 Metric: What is our current implied 90/90 status?
Data Takeaways

- **Key Takeaway(s):**
  - If 90/90 was calculated today, Kairos would earn approximately a 95.73% of students at or above the 90/90 threshold – earning the school full points on APR attendance.
  - 94.02% of Kairos students are tracking to earn full points; 1.71% are tracking to earn ½ points; and 3.42% are tracking to earn ¼ points.

90/90 Metric: What is the 90/90 status for individual students?

Data Takeaways

- **Key Takeaway(s):**
  - This list is an early look at how students factor into 90/90, but more importantly is a tool to help support students and set the tone for attendance this year (example: students outside of green area may be worth discussing support systems such as calls home, meeting with school leadership, potential transportation issues, etc.)
