Star Early Literacy: The minimum GE score is -1; 0 is shown as  $\mathbf{0}$ ; values below 0 are given a **PK** prefix with a number indicating the month, which is the *inverse* of positive GE values:

GE	Shown on Reports As	Meaning
-1.0	< PK or PK.0	Student in month 0 of pre-Kindergarten
-0.9	PK.1	Student in month 1 of pre-Kindergarten
-0.8	PK.2	Student in month 2 of pre-Kindergarten
-0.1	PK.9	Student in month 9 of pre-Kindergarten

Grade Equivalent (GE) is a norm-referenced score that represents how a student's test performance compares with other students nationally. For example, a fifth-grade student with a GE score of 7.6 performed as well as a typical seventh-grader after the sixth month of the school year. This score doesn't necessarily mean that the student is capable of reading seventh-grade material—it only indicates that the student's reading skills are well above average for the fifth grade.

Grade Placement (GP) is a numeric representation of a student's grade level, based on the specific month in which a student takes a STAR Reading test. STAR Reading considers the standard school year to run from September through June and assigns increment values of 0.0 through 0.9 to these months. The software automatically assigns grade placements using a student's grade level and the month in which a STAR Reading test was taken. GP is important because PR and NCE values are based not only on the Scaled Score but also on the grade placement of the student at the time of the test.
