

PREMIUM ADD-ON SOLUTION

# TalkingPoints Document Translation

Translate the everyday documents schools and teachers share with families - newsletters, flyers, invitations and more!

### Translate and send attachments

Fast and simple! School staff see a pop-up prompt offering the option to translate .pdf or .docx message attachments. They will be able to view both the English and translated versions they send.

### Easy and accessible for families

Families simply click on the link in the message they receive and read it in their home language.

### Save district resources

Support daily communication with families while saving language services resources for legal document support and in-person or specialized interpretation needs.
